

Jazz Pharmaceuticals®

Life-Changing Medicines.

Redefining Possibilities.

## OUR FOCUS

Jazz Pharmaceuticals is a global biopharmaceutical company dedicated to developing and commercializing life-changing medicines that transform the lives of patients with serious diseases – often with limited or no options.

We are committed to doing our best to make sure our medicines reach both adults and children. Paediatric diseases present unique challenges, but we aspire to overcome them and improve survival outcomes for difficult-to-treat cancers.
